

August 2011

Recently I had occasion to visit  
The Clinic of Natural Medicine as I  
had a problem with movement in my  
left arm. I saw Stephen Allen who  
performed various treatments - massage,  
acupuncture, heat pads etc over a period  
of six weeks. Although there was some  
improvement Stephen Allen was not happy  
totally so embarked on further  
questioning as to my general health over  
the past year. When I explained that  
I had seen my Dentist three times over  
the past year for emergency fillings alarm  
bells rang & he conducted tests on a  
special machine that determines whether there  
are any toxins present in the liver, kidneys  
gall bladder etc. which he thought there  
might be from the mercury fillings in my  
teeth being disturbed. This procedure proved  
that there was some toxins present & that  
this could be why the initial treatments were  
not curing the problem. I was then advised  
to take a course of Chlorella tablets to flush  
out the toxins. These tablets are organic bio  
nutrients so are perfectly safe. I was

prescribed six tablets per day for six weeks.  
I have finished the course and the movement  
in my arm has improved by nearly 100%  
I am nearly 76 years of age and am extremely  
fit and active, I have decided to keep on  
taking the chlorella - only 2 per day now - as  
I feel they can only do good & keep me  
fit & well.

Audrey Plackett.
