

Hi

Hope you had a good Christmas.

Just letting you know how Matthew is getting on, his eczema is a lot better on the diet and treatment and he is much more brighter in himself.

The capsules for his immune system made him have loads of energy, he wouldn't sit down, he was all the time running around and not going to bed so we gave him them on alternate days.

We are really pleased with his progress after trying all sorts of conventional medication for his asthma that just seem to make him worse and did not stop his coughs and recurring colds.

He has never been so well since we stopped dairy products and replaced them with other calcium alternatives. He is like a new child of six going on fourteen now!

Thank you for your advice and super Bicom device!

Best wishes for 2014

Mrs M. B. Reepham, Lincoln.
