

Dear Stephen

Just to keep you updated about my diagnosis and markers for Rheumatoid Arthritis. The consulted has just given me my latest blood results and he has confirmed my condition as acute rheumatoid arthritis.

The good news is despite no change from the steroids and anti-histamines he has given me my blood results show a reduction of CRP and WBC of 147 down to 115 and 14-1 to 9-1 after just one treatment with you.

Fantastic Stephen! And I look forward to my next visit with more than hope we can beat this.

Many Thanks

Mrs S W Lincoln
